

Diploma in Health Assistant (2 Years)

Build a Rewarding Career in Healthcare and Patient Support

Course Overview

The Diploma in Health Assistant is a 2-year professional program designed to prepare students for essential roles in hospitals, clinics, and community healthcare settings. This course offers a strong foundation in nursing practices, human biology, patient care, and community health, along with hands-on training in hygiene, nutrition, first aid, and basic medical procedures. Graduates are equipped to assist doctors and nurses in providing frontline patient care and managing basic health services.
